1. INTRODUCTION

Introduction

Listbingo is a smarter classified extension for Joomla. If you are looking for a classified extension for your new classified site or you are tired of using other extension that does not live to your expectation, then we suggest you to try Listbingo. It will surely fulfill all of your requirements and you will look no further.

Listbingo is extensible with addons. **Nslider** is a replacement addon for the default image slider of listbingo. Listbingo comes with default smooth gallery powered image slider and it has limitation like it cannot pop up large thumbnail for larger image.

If you are not satisfied with the default image slider try nslider, this is based on freely available nooblslider. Just install the addon and publish and it will automatically replace the default imageslider, uninstalling it will restore the default image slider.

2. INSTALLATION

Step 1

Login to Joomla! Administrator Area with your username and password

Step 2

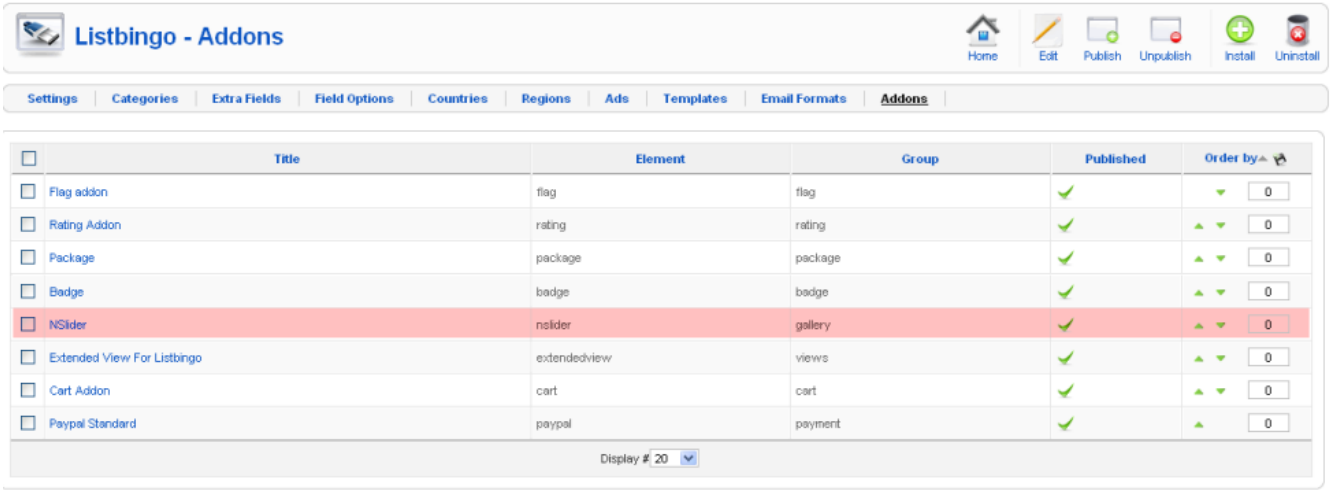
Publish the added addon. The addon is ready to work in the frontend.

Go to **Components > Listbingo > Addons** to install the "nslider" addon. In the addons list page click the Add button at the top right corner of the screen.

Step 3

Publish the added addon. The addon is ready to work in the frontend.

Browse the downloaded addon and install it by clicking "Upload and Install" button at the side of the browse button. The installed addon will then be listed in the Addons list as shown in the screenshot below.



Step 4

Publish the added addon. The addon is ready to work in the frontend.

3. Front end Use

Before the installation of Nslider in the Ad detail page smoothgallery powered image slider is available as shown in the screenshot.

On installing and publishing the “Nslider” Addon, the image slider will be automatically replaced by the installed Nslider Addon.

Later if you uninstall the Nslider then thee default image slider will be restored automatically.
